Retail Pulse : Sales Trend Analysis

Business Insights : Sales Trend Analysis

Yearly Growth: Sales dropped in 2020, but after 2020 they have grown steadily. In 2023, we hit a record high of ₹502.27 million.

Best & Worst Months: Our busiest months are May (₹216 million) and July (₹215 million). Our slowest month is February (₹195 million).

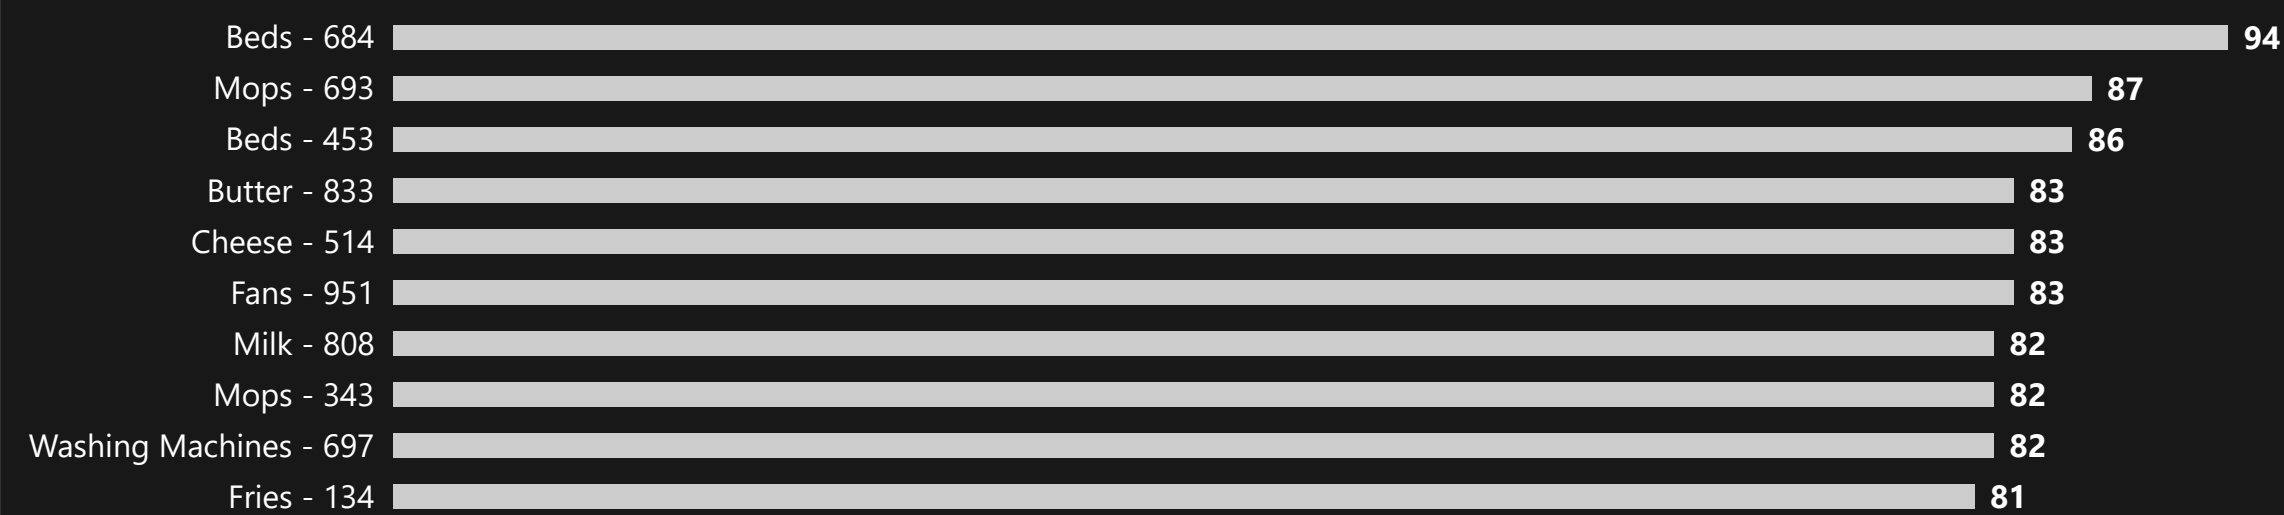

Weekly Habits: Order numbers stay consistent all week, but revenue peaks on Tuesdays (₹362.36M) and Wednesdays (₹362.17M).

Most Profitable Products

Product Category Analysis

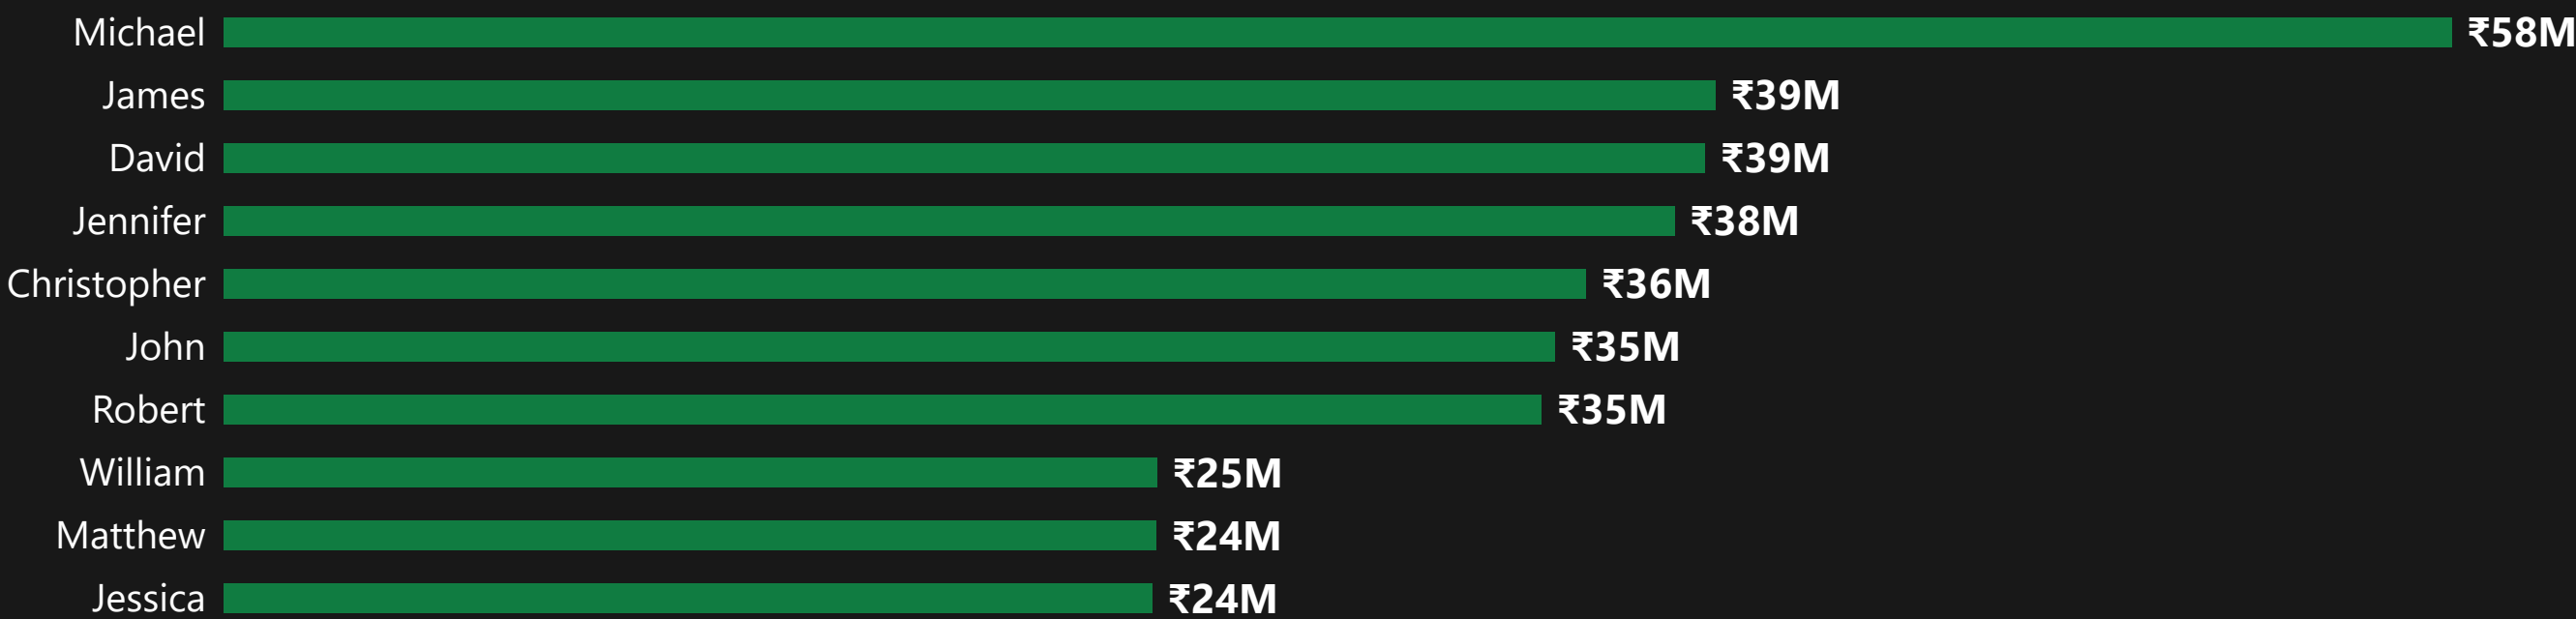

Business Insights: Profitability & Core Products

- **Most Profitable Products:** The highest-profit product is **Beds - 120**, generating ₹78K in net profit and after that followed by **Mangoes - 912** (₹70K) and various models of **Refrigerators** (₹67K).
- **Core Selling Products:** **Beds** and **Refrigerators** are the backbone of our business. We sell the highest number of them, and they bring in the most overall revenue and profit.

High Value vs. Normal Customers

Revenue by Customer Segment

Business Insights: Customer Value & Importance

- Top Individual Buyer:** Michael is our top individual customer. He generated ₹58M in sales, which is nearly ₹20M more than our next biggest buyer.
- Equally Weighted Segments:** Our ₹2.51 billion total revenue is split almost perfectly in half between Corporate (50.04%) and Consumer (49.96%) clients. Both groups are equally important to our success.
- High-Value Dominance:** Half of our customer base (50.25%) is 'High Value.' Retaining these 50K buyers is the key to protecting our current revenue.

Retail Pulse: Region & Country Sales

Top Region by Revenue

Delhi

Total Quantity by State

Total Revenue by State

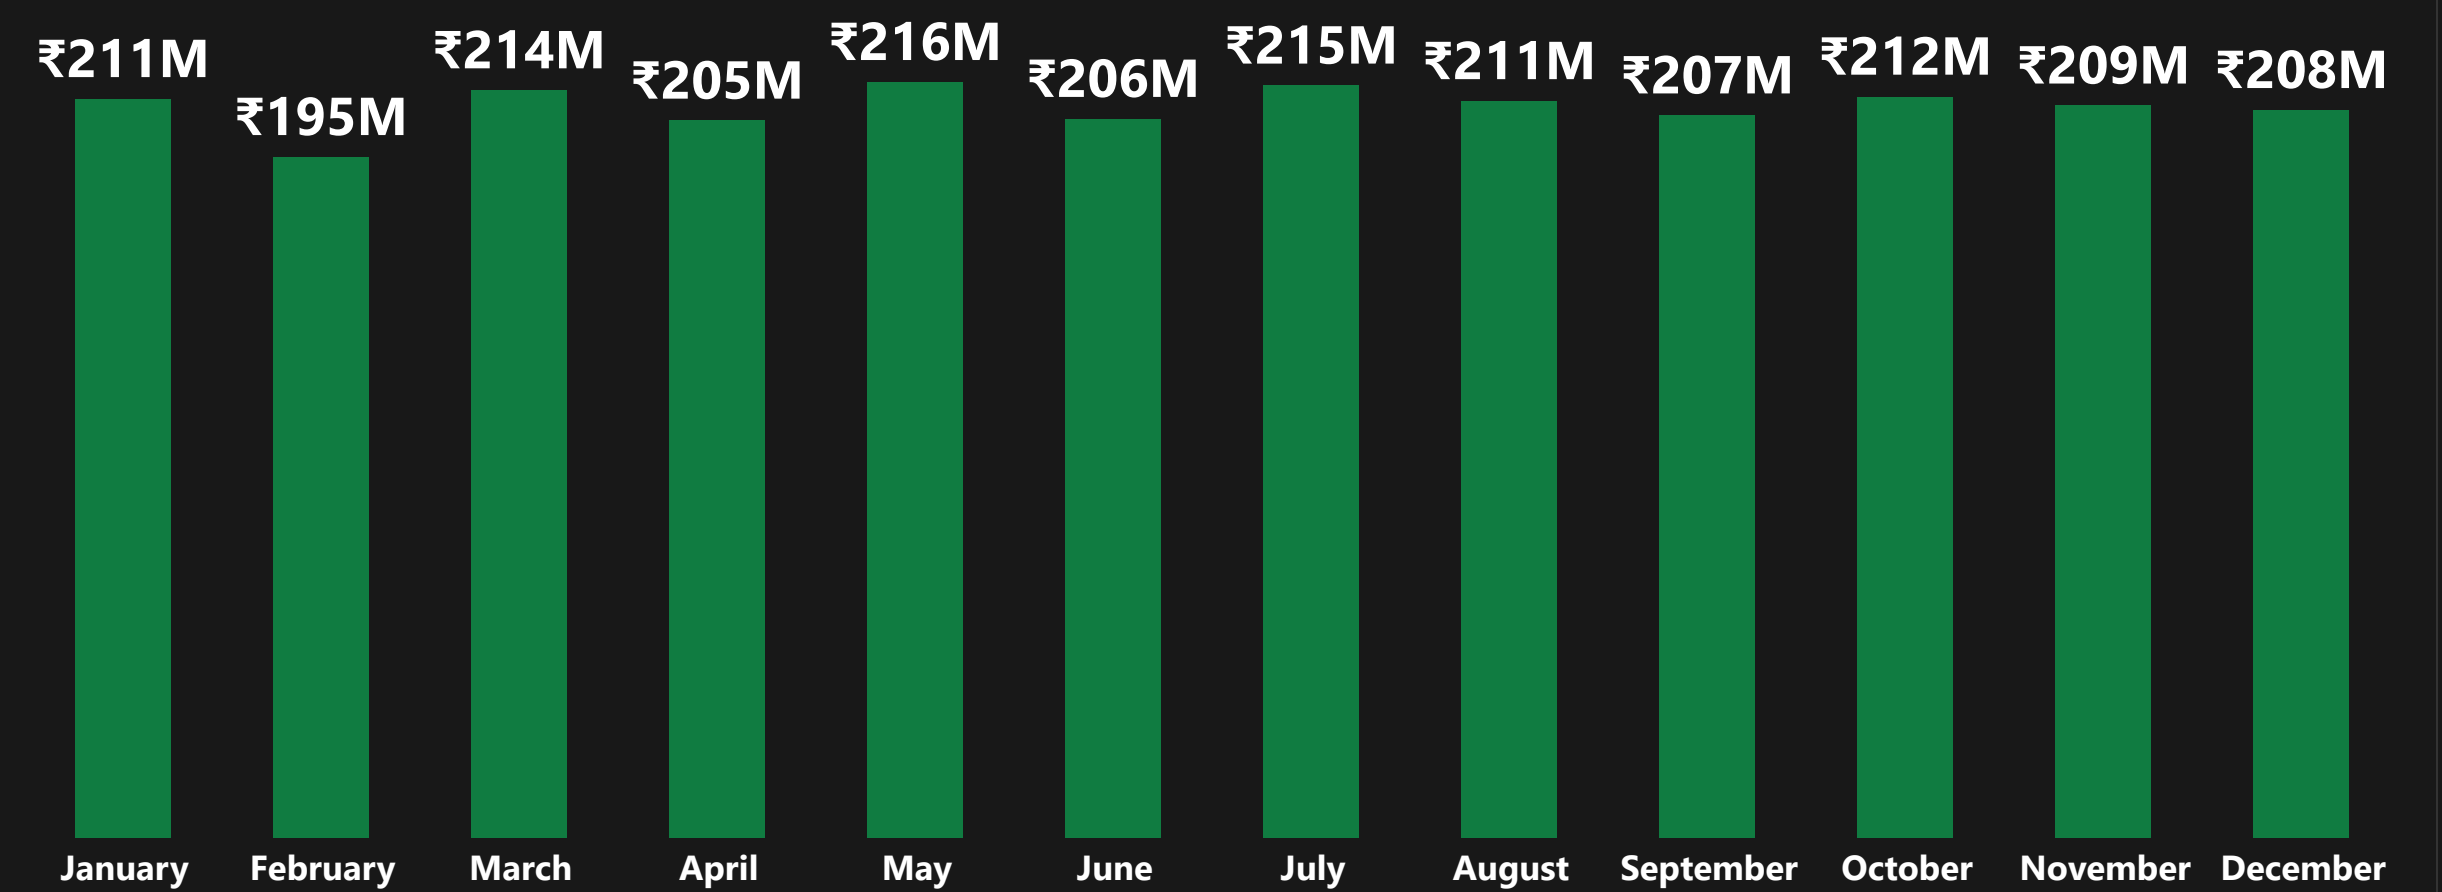

Business Insights: Regional Sales Distribution

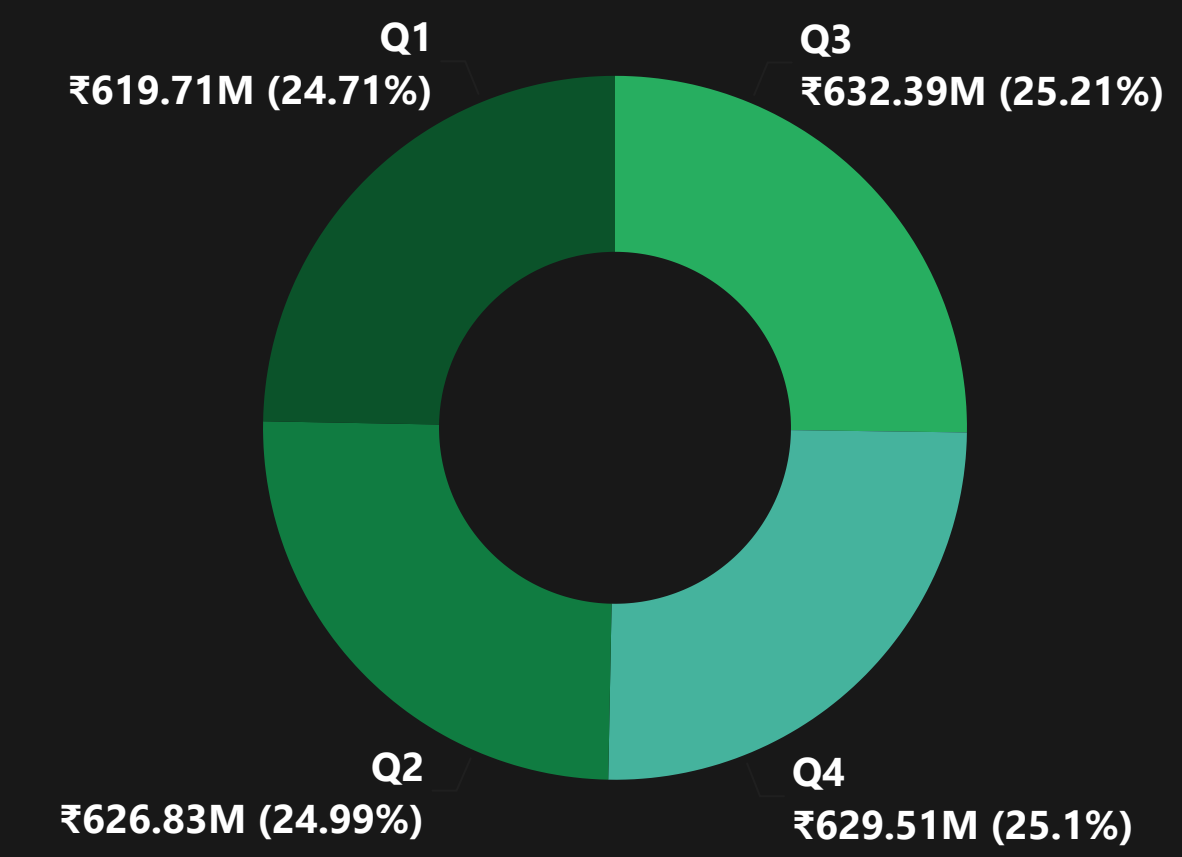

- Top Revenue Region:** Our single highest revenue-generating region is **Delhi**.
- Consistent Volume Across States:** Orders are steady nationwide. **Rajasthan** and **Punjab** lead with 56K units each, but the rest of the country is incredibly close (54K-55K), proving our strong market reach.
- City Tier Equality:** Revenue is split almost perfectly evenly across **Tier 1 (₹0.84bn)**, **Tier 2 (₹0.84bn)**, and **Village (₹0.83bn)** locations. This indicates that our product demand is not limited strictly to urban centers.

Quarterly Sales

Seasonal Profit Trend

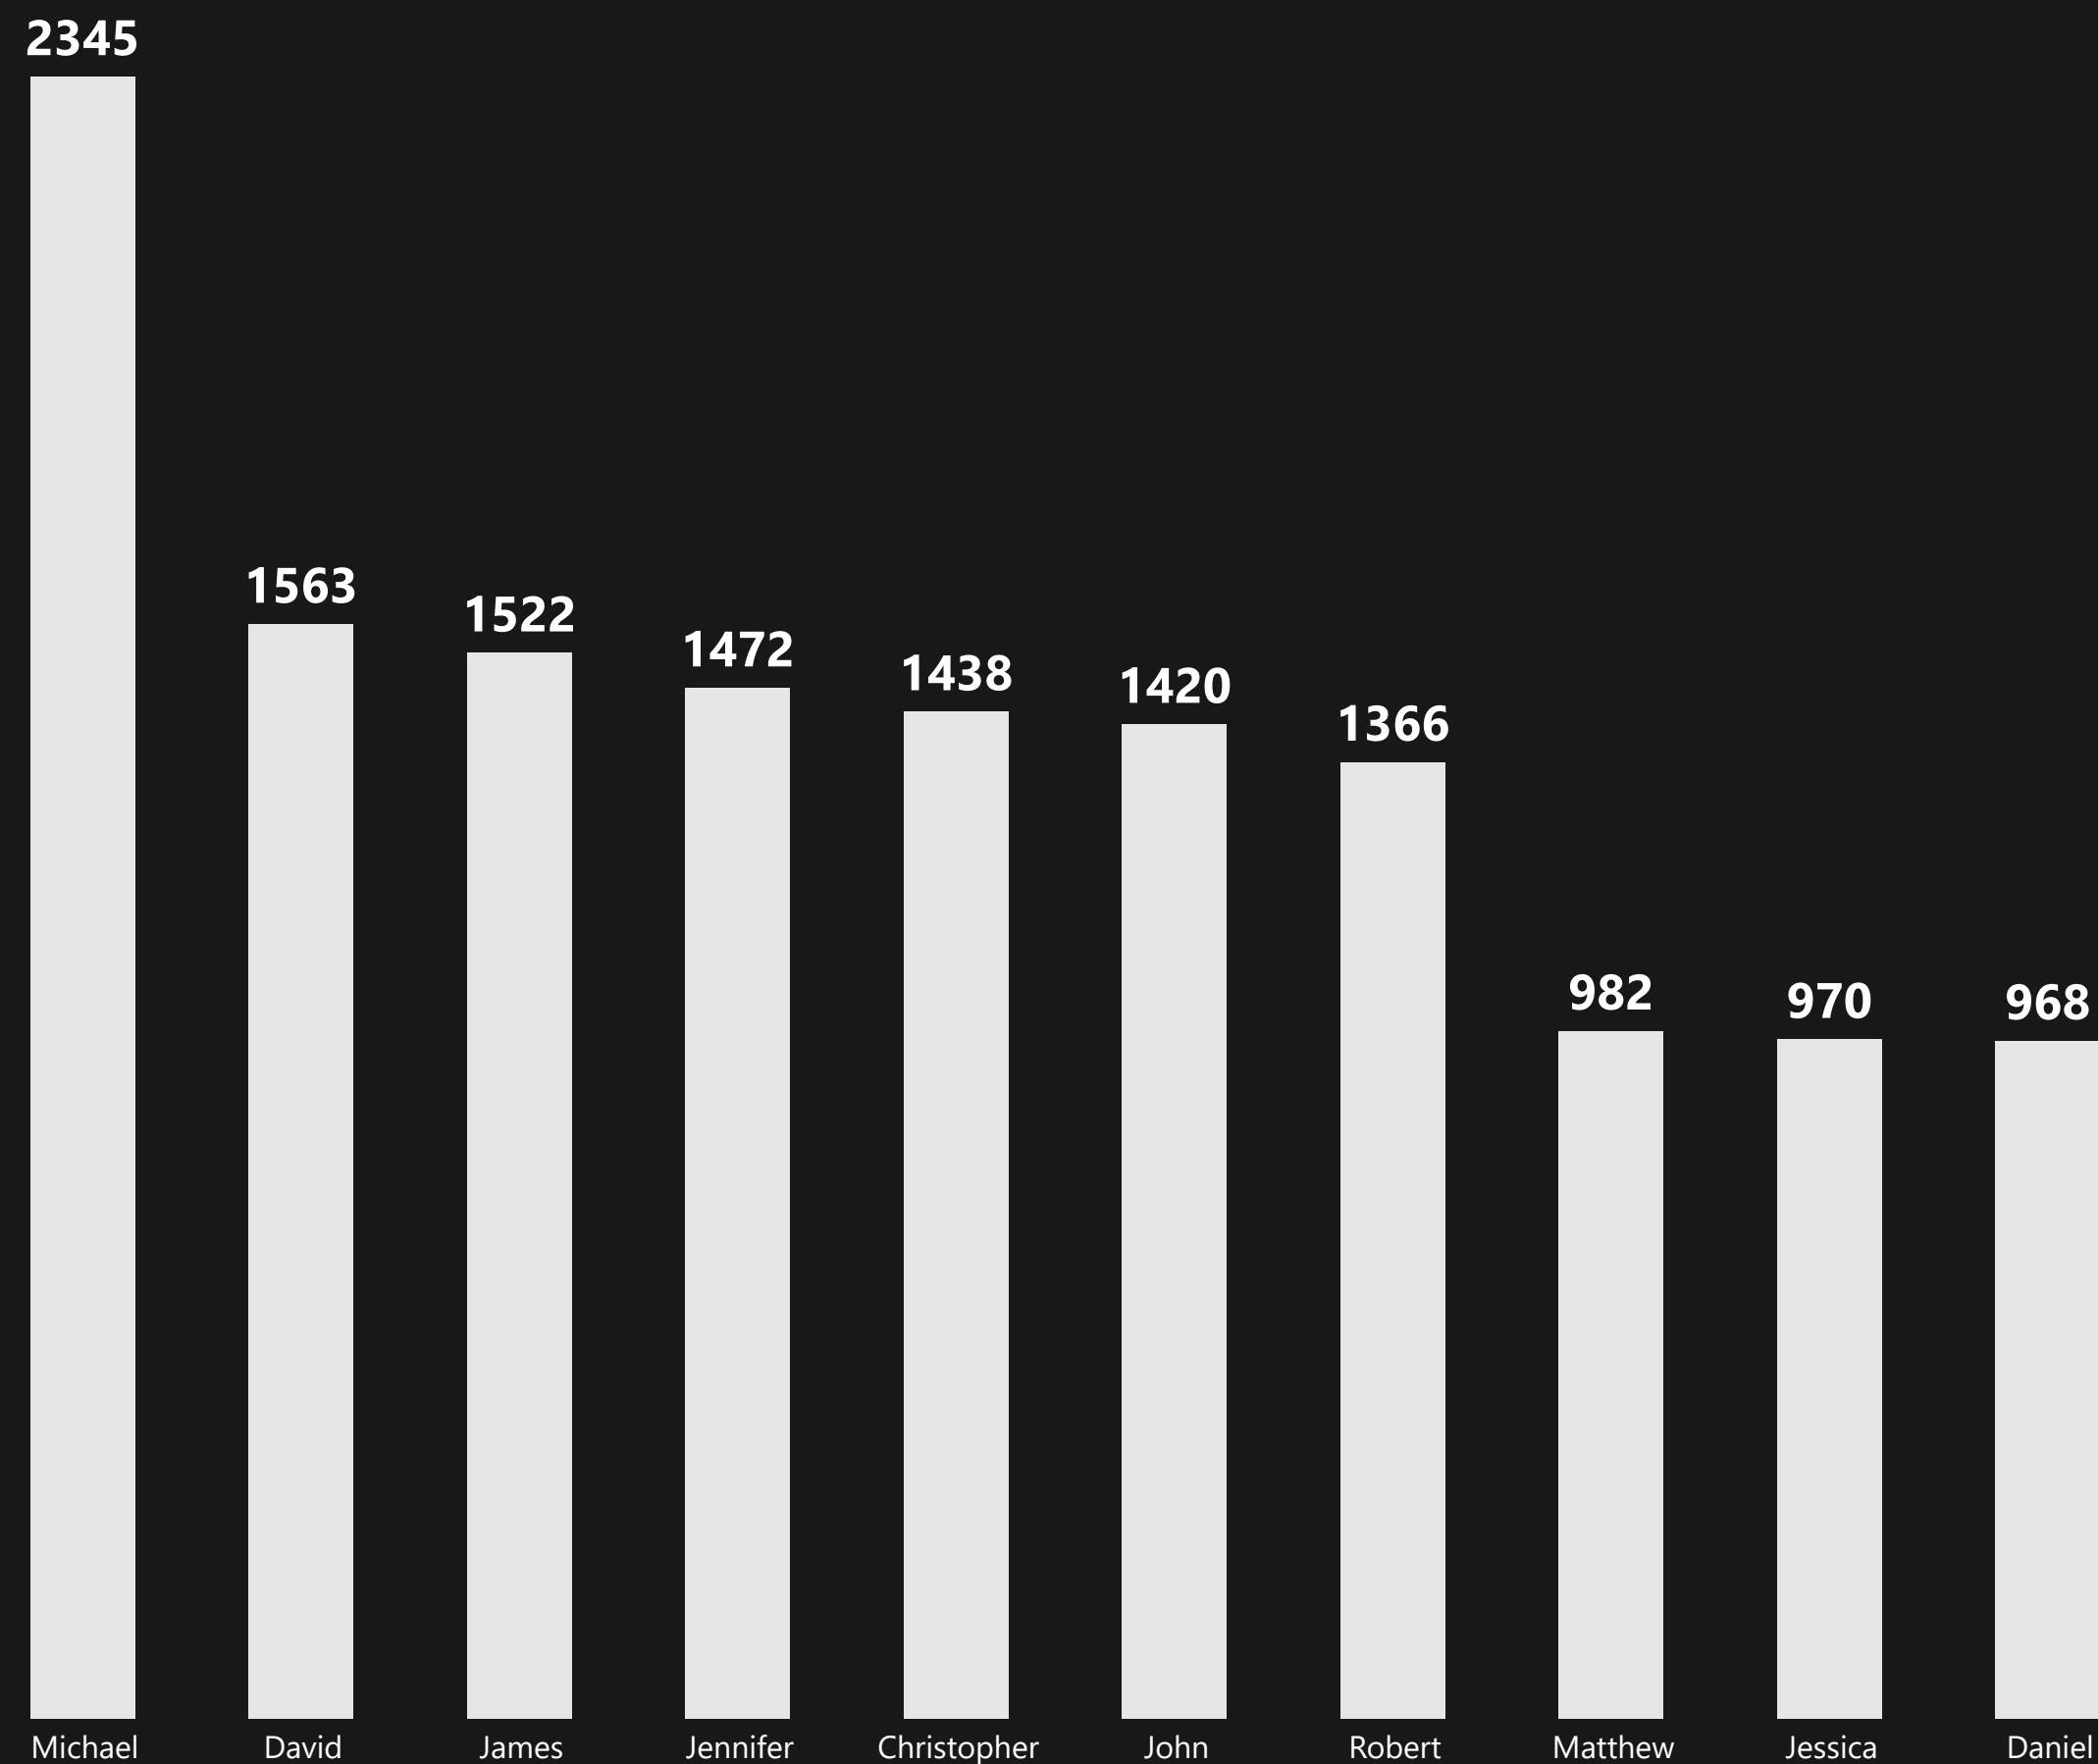

Business Insights: Seasonality & Profitability

- **Highest Profit Month: July** is our most profitable month, generating a peak of **₹32.25M** in net profit.
- **Profit vs. Revenue Efficiency: May** brings in the highest total sales (**₹216.14M**), but we keep a larger percentage of that money in **July**, making it our best month for actual profit.
- **Seasonal Trade: Q3 (July - September)** is our best season. Thanks to a massive **July**, it brings in the highest revenue (**₹632.39M**) and the most profit (over **₹94M**) of the year.

Repeat vs. New Customer

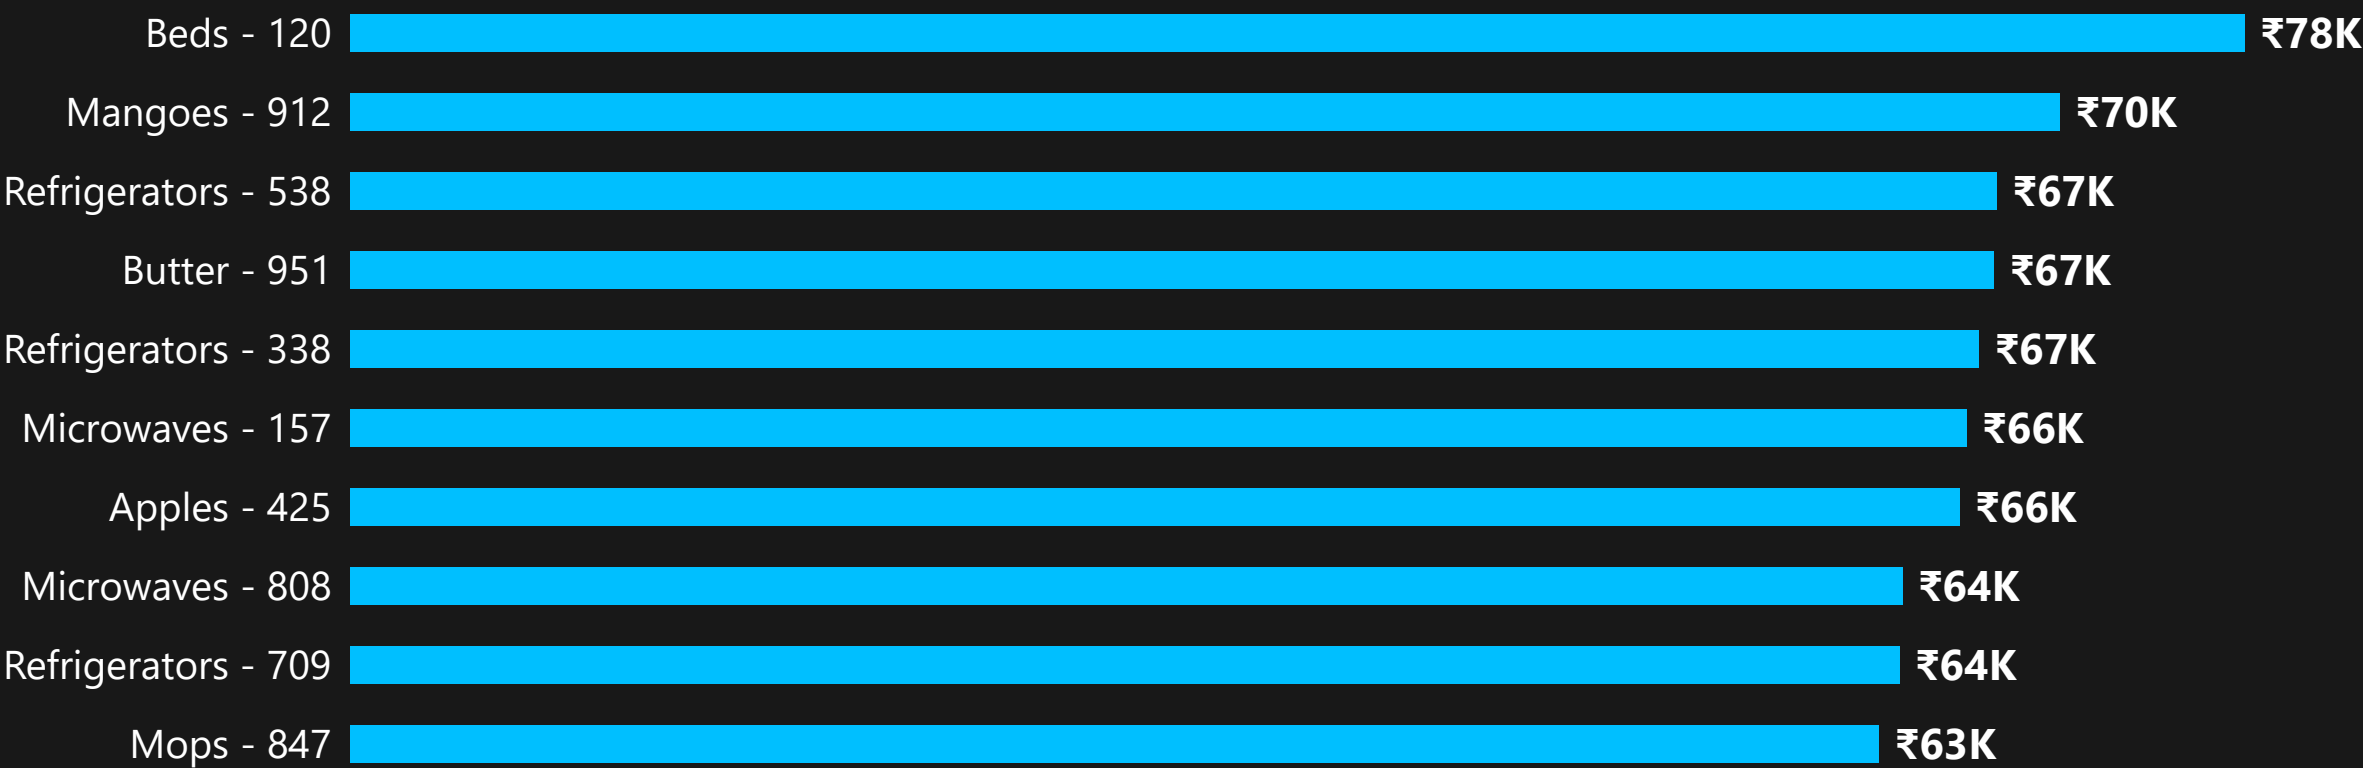

Business Insights: Purchasing Behavior

- **100% Customer Retention:** We have a 100% repeat customer rate. Every single person who buys from us comes back, with each customer placing at least 4 separate orders.
- **High Volume Loyalty:** Our top customers are extremely loyal. Our top buyer, Michael, has placed 2,345 orders alone.
- **Average Spend:** Our customers spend an average of 25.08K, proving that our loyal buyers have great spending power.

Slowest Moving Products

High Demand Months

Product Demand Trend

Business Insights: Inventory & Stockout Risk

- **Highest Stockout Risk:** Our highest flight-risk item is **Beds - 684**. It moves faster than any other product in our inventory (94 units), making it the most likely item to go out of stock if supply chain delays occur.
- **Secondary Risks:** We must also closely monitor stock levels for **Mops - 693** and **Beds - 453**, which follow closely behind in total volume.
- **Demand Consistency:** Overall inventory demand remains incredibly stable throughout the year, hovering strictly between 43K and 47K units per month, meaning we can forecast supply needs with high accuracy.

- Business Insights: Churn Risk & Master Interactivity
- At-Risk Customers:** Churn risk depends on "Days Since Last Purchase." A 90-day gap means high flight risk. Remarket to them immediately.
 - Master Filtering:** Use the control panel on the left to instantly isolate performance by specific products, timeframes, or individual Customer IDs.
